PROJECTS

Salon-Appointment-Booking Website

- Developed a responsive and interactive salon website using HTML, CSS, and Bootstrap,
- Implemented an interactive booking form, allowing clients to schedule appointments with ease.
- Created a back-end system using Node.js and Express.js to handle form submissions and data processing.

Scribbler - blog - website

- Designed and implemented the website's homepage with a header featuring the site's title "Scribbler" and the subheading "Explore, Imagine, Create." Included "Sign Up" and "Sign In" buttons using modal dialogs
- Created a segment with 5 identical posts displayed in pairs, each containing the post's heading and author's name.
- Designed the Create Post Page, positioning the post title at the center of the screen, above the post text.

Password-Generator

- Developed a React-based password generator with customizable length and character types.
- Utilized Vite and Tailwind CSS for fast development and responsive design.
- Ensured code quality with ESLint and implemented strong security measures.
